Job Description

Front End Developer

Josh Technology Group was launched in 2009 and it has been 17 years since our inception & we have been profitable from day 1 & aspire to reach new heights. JTG is a bootstrapped organization that has multiple fully owned software products. JTG acts as a “Product Builder” for multiple US, UK & India-based startups. JTG has successfully created and launched more than 100 products, spread across various industries, and is working on many more exciting new ones. We act as CTO offices for various companies across the globe. When we say CTO offices, we kind of own the product end to end. We work with the CXO teams on the product roadmap, and on the technology roadmaps, and we own end-to-end development of it.

JOSH
TECHNOLOGY
GROUP

What does JTG do?

We work on only the latest & trending technologies & never shy away from inculcating the latest technologies in the organization. Currently, we are extensively working on technologies like - NodeJS, Golang, Flutter, Java, Python, Django, ROR, PHP, Spark, Angular, Angular JS, React (JS and Native) DevOps: AWS, GCP (Google Firebase), Azure, Terraform, Ansible, etc.

We work on projects and products in domains like Healthcare, Healthcare e-commerce, e-commerce, Healthcare Transportation, Fintech, Edutech, and Parking Solutions.

Our very own software product, Pod.AI is in the recruitment & assessment industry and it has received an overwhelming response in the market.

What makes us Different?

Being a very young organization our leaders believe in the potential of young talent & don't shy away from giving great opportunities to our people to grab, grow, and explore as much & as early as they can. Hierarchy doesn't exist in our dictionary.

We present an opportunity to be mentored & grow with the best mentors, including the founders.
